Assent Form for 12 to 15 years old (English version)

Principal Investigator: Aida M. Salonga, MD
Institution: Institute of Child Health and Human Development, University of the Philippines - National Institutes of Health
Sponsor: Department of Health
Project: National Surveillance of Guillain-Barre Syndrome in the Philippines Version 1

Information to participants and parents

Guillain-Barre syndrome (GBS) is the most common cause of flaccid paralysis in childhood in the post-polio myelitis eradication era. Guillain-Barre syndrome is a sudden involvement of the nerves characterized by a rapid ascending weakness with variable autonomic and cranial nerve dysfunction.

This will be the first nationwide survey of GBS among Filipino patients. This survey will provide important information on the how common GBS is in the Philippines.

Assent form

I am being asked to decide if I want to be in this study.

I know that if I were to be in this study,

- My height and weight will be measured.
- A stool sample of about 1 spoonful will be collected from me with the use of a spatula/applicator stick
- I asked and got answers to my questions. I know that I can ask questions about this study at any time.

I know that I can stop at any time in the study without anyone being mad at me. My doctor will still take care of me.

I want to be in the study at this time.

Philippines Version 1

Impormasyon para sa mga kalahok at mga magulang

Ang Guillain-Barre syndrome (GBS) ay ang pinaka karaniwang sanhi ng malambot na paralysis ng mga bata pagkatapos naalis ang polio sa mundo. Ang GBS ay biglaang pagkaapekto ng mga ugat sa paa at kamay na nagreresulta sa mabilis na paakyat na paralysis ng paa at kalimitang naapektuhan din ang kakayahan ng autonomies sa buong katawat (katulad ng altrapresyon at tibok ng puso) at ugat ng mukha.

Ito ang unang survey ng GBS sa Pilipinas. Ang pagsusuri na ito ay magbibigay ng mahalagang impormasyon kung gaano kalaganap ang GBS sa Pilipinas.

Kasulatan sa Pagsang-ayon

Ako ay niyayaya sumali sa pag-aaral na ito.

Alam ko na kung ako ay sasali rito,

- Ang aking taas at timbang ay susukatin.
- Ako ay kukuhanan ng dumi sa pamamagitan ng pagkuha gamit ng spatula o applicator stick.
- Ako ay nagtanong at sinagot ang aking mga tanong. Alam ko na ako ay maaaring magtanong tungkol sa pag-aaral na ito sa anumang oras.

Maaari akong umayaw at huminto sa pagsali sa anumang oras na gugustuhin ko na walang magagalit sa akin. Ang aking duktore ay patuloy na mangangalaga sa akin.

Pumapayag akong maging kasali sa pag-aaral na ito.
